## What's in the Box

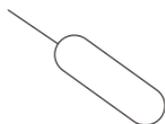

Camera

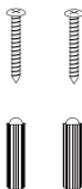

Solar panel

Bracket

Card Removal Pin

Mounting kit

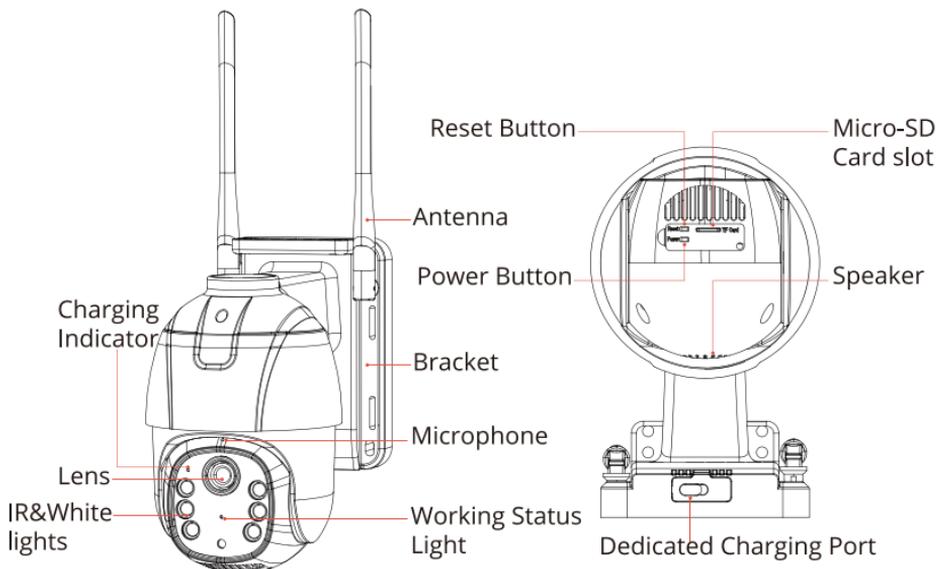

Charging cable

Quick Start Guide

# Product Description

Power Button	Press and hold for 5s for power on/off the camera
Reset Button	Long press for 5s until hearing the "Boogu" sound to reset the camera
Micro-SD Card slot	Support local SD card storage (up to 128G)
Charging Indicator	<b>Rouge</b> indique une recharge en cours ; <b>Bleu</b> indique une recharge terminée.
Working Status Light	Red light flashes slowly: Power on state
	Flashing Red light quickly:waiting for network connection
	Red and blue lights flash alternately:SIM card recognition failed
	Blue light flashing slowly:SIM card recognition is successful
Dedicated Charging port	Use 5V2A power adapter to charge this camera
Antenna	4G dedicated signal antenna

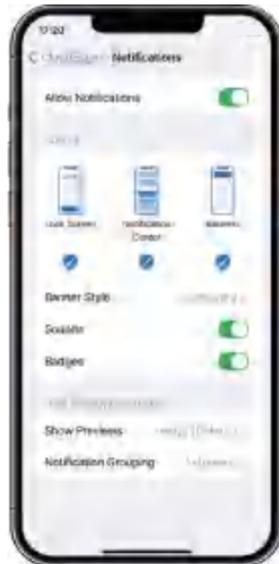

## Install CloudEdge app

Search "CloudEdge" in the app store or on GooglePlay or scan the QR code to download and install the app on your phone.

**NOTE:** Please turn on two permissions below when you use this app for the first time.

1. Allow CloudEdge access to mobile cellular data and wireless LAN, or you will be unable to add the camera.
2. Allow CloudEdge to receive push messages, or the phone will not receive notifications when motion is detection or the audible alarm is triggered.

3.1 Register account: New users need to register by e-mail. Click "Register" and follow the steps to complete registration and log in.

3.2 Help and feedback: For product issues or questions, please email [support@camstro.com](mailto:support@camstro.com). with your product model number. We will reply to you within 24 hours.

## About SIM card

A SIM card is included in the camera, and this card supports the major carrier networks in your country.

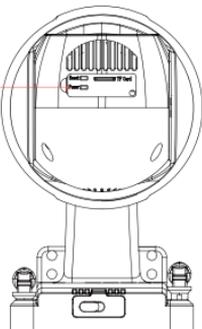

It has the advantages and use, fast and convenient data recharge, strong network compatibility, strong 4G signal, strong compatibility with the camera, no need to sign an agreement with the operator, etc. It is recommended for you to use it.

**Note:** If your camera has any problems or if you need to use your own SIM card, please contact our after-sales service mailbox: [support@camstro.com](mailto:support@camstro.com).

We will provide you with professional help.

## Switch on camera

Press and hold the power button of the camera for 5 seconds until the working indicator on the side of the lens lights up in red, then let go. Wait for about 30 seconds until the working indicator turns blue light flashing, you will hear the voice prompt "Waiting to connect", which means the camera has successfully connected to the 4G network and the next step is to add the camera in the APP.

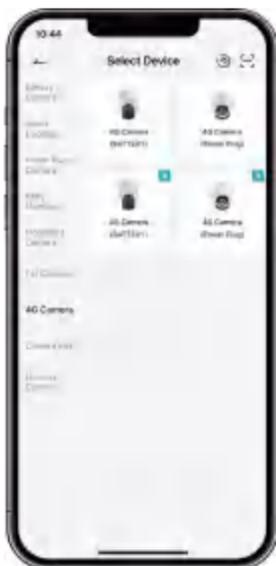

Power Button (long press until hear a sound)

## Add camera

Tap "+" to Add Device

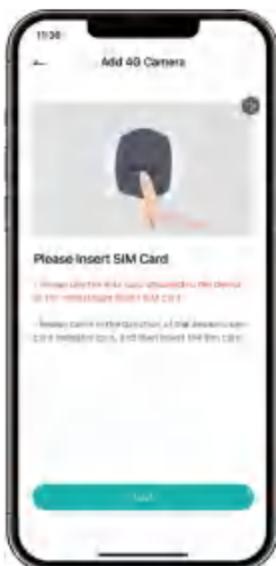

Select 4G Camera

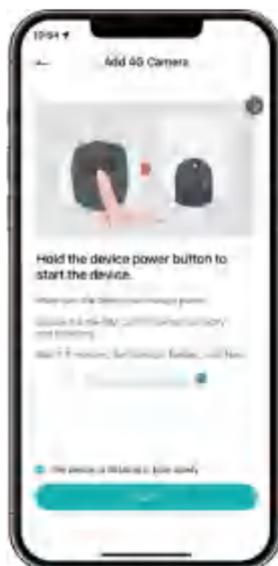

Scan QR Code

Click to Configure

Insert SIM Card

Power on Camera

Wait for Connection

Device Added

Add failed? Please refer to the following to resolve the issues:

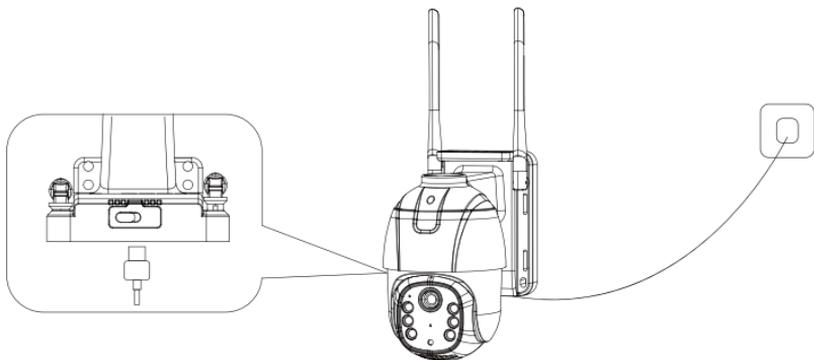

<p><b>Camera voice prompt:</b> Wait for connection time out</p>	<p><b>Solutions:</b> Press the power button to restart</p>
<p><b>Working light status:</b> Indicator light off</p>	
<p><b>Camera status:</b> If the network is not configured for a long time, the device will automatically sleep</p>	
<p><b>Camera voice prompt:</b> No LTE signal</p>	<p><b>Solutions:</b> 1. Please check if your SIM card's data plan is available 2. The current 4G signal is weak please move the camera to a better signal location</p>
<p><b>Working light status:</b> Red light keeps flashing</p>	
<p><b>Camera status:</b> SIM card has no data plan or 4G Signal difference</p>	

**Note:** If you try to add a camera several times and still fail, please Contact the customer service staff for help.

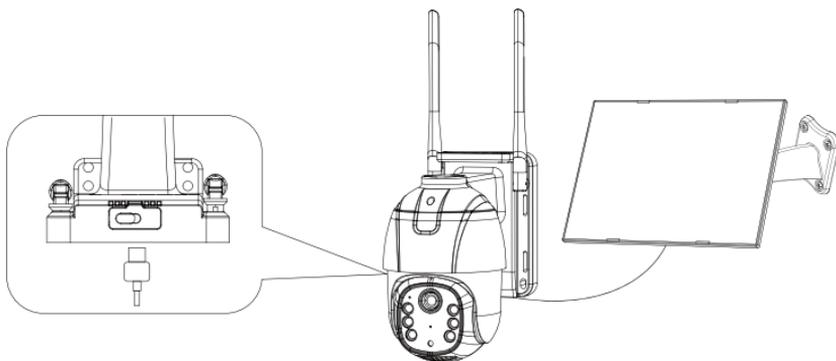

## Charge the Battery

It's recommended to fully charge the battery before mounting the camera outdoors.

Charge the battery with a power adapter.(not included)

Charge the battery with the Camstro Solar Panel

Charging indicator (at the top left of the lens):

**Red** LED:Charging

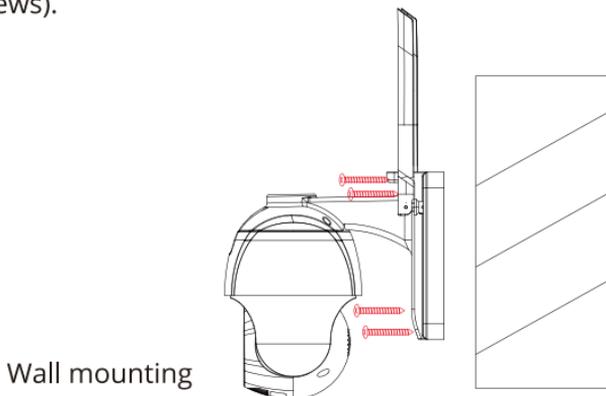

**Blue** LED:Charging completed

**Note:** For better weather resistance,insert the charging port of the solar panel into the rubber plug,and the rubber plug fully covers the charging port.

Safety Reminder: Do not use a non-5V power adapter to charge the camera, and do not charge near fire and heaters. If the battery emits odor, heat, deformation and other abnormal conditions during the charging process, please stop charging or using it immediately.

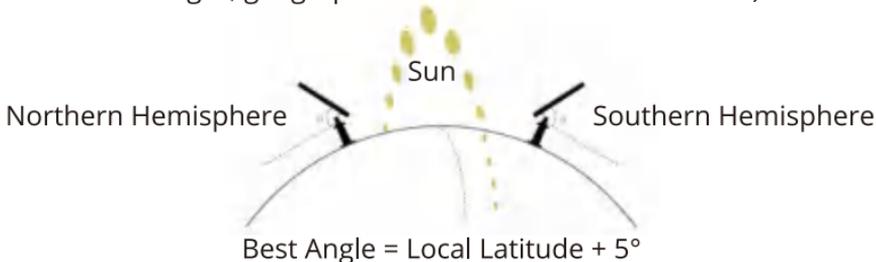

## Install camera

1. Mark the hole position of the expansion screw according to the bracket.
2. Use an electric drill to drill the hole.
3. Install the rubber particles (it is recommended to use hammers and other tools to knock and install).
4. Use screws to install the bracket to the wall (inside the expansion screws).

## Solar Panel Installation

1. It is recommended to install solar panels in a location with the most sunlight throughout the year. With just a few hours of direct sunlight each day, the solar panels can provide enough power for the camera. (The energy supply from solar panels will be affected by weather conditions, seasonal changes, geographical location and other factors.)

2. Use the screws provided in the package to install the solar panel to the bracket. Please confirm whether the screws are tightened (pay attention to the direction of the bracket) or the screws are tightened (pay attention to the direction of the bracket)

3. Use the screws provided in the package to first make a hole in the wall, install the rubber particles, and then fix the bracket to the wall with screws.

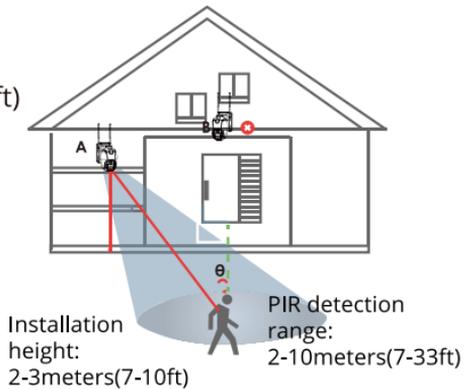

4. Adjust the angle of the solar panel by adjusting the screws of the bracket until direct sunlight can shine on it. Tighten the screws to fix it.

## Other Mounting Method

1. Install the camera 2-3 meters (7-10ft) above ground. The detection range of the motion sensor would be maximized at such a height.

2. For effective motion detection, please install the camera angularly.

**Note:** If a moving object approaches the PIR sensor vertically, the camera may fail to detect motion.

## Regulatory Compliance and Safety Information

Read all information and instructions in this document carefully before using the device and keep it for further reference. For more device information and instructions, please visit our website at [www.camstro.com](http://www.camstro.com).

### FCC Information

#### FCC compliance :

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## FCC Conditions

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

## RF Exposure Warning Statements :

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment . This equipment shall be installed and operated with minimum distance 20cm between the radiator body .

## EU/UK Compliance Statement

This product and - if applicable -the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized European standards listed under the EMC Directive 2014/30/EU, the LVD Directive 2014/35/EU, the RoHS Directive 2011/65/EU, Wi-Fi device: the RE Directive 2014/53/EU.

This product and - if applicable - the supplied accessories too are marked with "UKCA" and comply therefore with the following directives: Electromagnetic Compatibility Regulations 2016, Electrical Equipment (Safety) Regulations 2016, the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Regulations 2012, Wi-Fi device: Radio Equipment Regulations 2017.

Directive 2012/19/EU (WEEE Directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon the purchase of equivalent new equipment, or dispose of it at designated collection points. For more information see: [www.recyclethis.info](http://www.recyclethis.info).

Directive 2006/66/EC and its amendment 2013/56/EU (Battery Directive): This product contains a battery that cannot be disposed of as unsorted municipal waste in the European Union. See the product documentation for specific battery information. The battery is marked with this symbol, which may include lettering to indicate cadmium (Cd), lead (Pb), or mercury (Hg). For proper recycling, return the battery to your supplier or to a designated collection point. For more information see: [www.recyclethis.info](http://www.recyclethis.info).

## Warnings and Cautions

**Safety Instruction:** These instructions are intended to ensure that the user can use the product correctly to avoid danger or property loss.

**Laws and Regulations:** The device should be used in compliance with local laws, electrical safety regulations, and fire prevention regulations.

**Electricity:** In the use of the product, you must be in strict 10 compliance with the electrical safety regulations of the nation and region. The equipment shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the equipment.

**Fire Prevention:** No naked flame sources, such as lighted candles, should be placed on the equipment.

**Emergency:** If smoke, odor, or noise arises from the device, immediately turn off the power, unplug the power cable, and contact the service center.

**Power Supply:** Device powered by Safety Extra-Low Voltage(SELV): The power source should meet limited power source or PS2 requirements according to IEC 60950-1 or IEC 62368-1 standard. Device powered by AC mains supply voltage: The equipment must be connected to an earthed mains socket-outlet.

**White Light Illuminator (If supported):** Possibly hazardous optical radiation emitted from this product. DO NOT stare at operating light source. May be harmful to the eyes. Wear appropriate eye protection or DO NOT turn on the white light when you assemble, install or maintain the camera.

**Using Environment:** DO NOT place the camera in extremely hot, cold, dusty or damp locations, and do not expose it to high electromagnetic radiation.

**Installation:** Install the equipment according to the instructions in this manual.

**Transportation:** Keep the device in original or similar packaging while transporting it.

**System Security:** The installer and user are responsible for password and security configuration.

**Maintenance:** If the product does not work properly, please contact your dealer or the nearest service center. We shall not assume any responsibility for problems caused by unauthorized repair or maintenance.

**Cleaning:** Please use a soft and dry cloth when clean inside and outside surfaces of the product cover. Do not use alkaline detergents.

**Reflection:** Make sure that no reflective surface is too close to the device lens. The IR light from the device may reflect back into the lens causing reflection.
